## UX/UI Designer

### Work experience

#### UX/UI Designer

Since May 2018 [Freelance](#) Poland

Working as a freelancer, I designed websites, crm systems, mobile apps, corporate identities and also did turnkey websites. During these projects, I've worked closely with Wordpress and Tilda.

#### UX/UI Designer

From August 2021 to November 2021 [Alisa TMS](#) Ukraine

While working for the company, I was involved in UX/UI design of the CRM system. By doing the analysis of the market, doing research and testing, it was possible to achieve maximum effect. Building the logic and connection between the user and the system was an ongoing task, which I managed to achieve excellently.

I also created promotional posts and banners for social networks.

#### UX/UI Designer, JPM

From January 2021 to July 2021 [PCFX](#) Ukraine

Over the course of this contract, I was engaged in development of the design of the company's internal system which displayed the statistics of the employees' roles and responsibilities, projects and tasks. While working on the product I researched the market, worked on user interactions with the system as well as worked on improving the logic of the product. I also worked as a PM on other products of the company.

#### UX/UI Designer

From July 2017 to October 2019 [LLC "Mebli Komfort"](#) Ukraine

While I was engaged in companies projects, I was involved in the development of the company website, promotion materials for social networks, advertising banners and worked on company branding.

#### Web&Graphic Designer

From June 2016 to July 2017 [LLC "Krayany Plus"](#) Ukraine

I was involved in the development of promotional materials for social networks, corporate identity and market analysis. I worked closely with the following tools:

- Adobe Photoshop
- Adobe Illustrator
- Adobe After Effects.

### Skills

#### Design

User Interface, User Experience, Storytelling, Web Design, Mobile Design, Graphic Design, Wireframes, Prototyping, Branding design, User Flows.

#### Research

Usability Testing, User Research, Task Analysis, Journey Mapping, A/B Testing, Content Analysis.
